

Governor's Task Force on Business and Jobs Recovery

Subcommittees

Immediate Recovery

What do we need to do in the very short term to support and aid the recovery of industries and protect workers who are providing essential work during the stay at home order – such as agricultural and other businesses supporting the food supply chain or those in the health care sector? And what do we need to do to aid those industries – such as retail and restaurants – that could open back with modified public health practices in the coming months as the stay at home order is modified?
